

Horizon Dental Search Tool

Need Help Finding a Dentist?

Use the *Online Doctor & Hospital Finder* to search for dentists who participate with your plan. Here's how it works:

- Visit **HorizonBlue.com/doctorfinder**.
- Select *Dentists* or *Dentists Outside of NJ* in *What Are You Looking For?*
- Choose your plan so the correct list of dentists appears. (i.e Dental Option, Dental Choice, Total Care Plan)
- Add your ZIP code and dental specialty, if needed.
- Select *Search*.

The screenshot shows the Horizon Doctor & Hospital Finder website. At the top, there are logos for Horizon and Blue Cross/Blue Shield, along with the text 'Welcome to Doctor & Hospital Finder'. The main heading is 'We've Got You Covered.' Below this, there are several search filters: 'What are you looking for?' with a dropdown menu set to 'Dentists'; 'Choose a Plan to Start' with a dropdown menu set to 'You MUST Select a Plan'; 'Zip Code | City, State' with an input field; 'Specialty' with a dropdown menu set to 'All Dentists'; and 'Dentist's Last Name' with an input field. A 'Search' button is located to the right of the input fields. At the bottom, there are three columns of links: 'Quick Links' (National Doctor & Hospital Finder, Marketplace Criteria - Doctors, Marketplace Criteria - Hospitals, Physician Quality Measurement), 'Let Us Know What You Think' (Send us Questions or Comments, Take our Survey), and 'Member Services' (Member Online Service, Mobile Member Online Service, Vision Services).

If you have questions, please call **1-800-4DENTAL (433-6825)**.

Dental Vocabulary

Visits and Exams

Fluoride Treatment - a prescription strength fluoride product that helps strengthen the tooth surface and prevent cavities.

Sealant Application - a composite material used to seal the decay-prone pits, fissures and grooves of children's teeth to prevent tooth decay.

Space Maintainer - a dental appliance that fills the space of a lost tooth or teeth and prevents other teeth from moving into the space. Used especially in orthodontic and pediatric treatment.

Prophylaxis - the scaling and polishing procedure performed to remove calculus, plaque and stains from teeth.

Restorations and Repairs

Restoration - any material or device used to replace tooth structure lost because of decay or fracture.

Amalgam - an alloy used to restore teeth.

Composite Restoration - a tooth-colored material used to restore teeth.

Endodontics

Endodontics - the dental specialty that deals with injuries to or diseases of the pulp, or nerve, of the tooth.

Pulp Cap - procedure used by which pulp is covered with a dressing or cement.

Pulpotomy - to remove a portion of the tooth's pulp.

Root Canal Therapy - the process of treating disease or inflammation of the pulp or root canal. This involves removing the pulp and tooth's nerves and filling the canal(s) with an appropriate material for a permanent seal.

Anterior - refers to the teeth and tissues toward the front of the mouth.

Molar - the broad, multicuspaped back teeth used for grinding food.

Bicuspid - a two-cusped tooth found between the molar and the cuspid.

Periodontics

Periodontics - the dental specialty that deals with injuries or diseases of the gums and supporting tissues.

Scaling - a procedure used to remove plaque, calculus and stains from the teeth.

Root Planning - the process of scaling and planning root surfaces to remove all calculus, plaque and infected tissue.

Gingivectomy - the surgical removal of gingival (gum) tissue.

Osseous Surgery - surgery performed to correct damage to gingival (gum) tissue and supporting structures as a result of periodontal disease.

Oral Surgery

Surgical Extractions - extraction of an unerupted tooth by making a surgical incision.

Incision and Drainage of Abscess - making an incision so the trapped liquids in the infected tissue can escape.

Major Restoration

Crowns - the portion of the tooth that is covered by enamel. Also a dental restoration that covers the area of the tooth and restores it to its original shape.

Dentures

Complete Dentures - a dental prosthesis that replaces all the natural teeth of a single dental arch.

Partial Dentures - a dental prosthesis that replaces one or more, but less than all, of the natural teeth and associated structures in an arch.

Fixed Bridges

Retainers - the part of a fixed bridge that attaches a false tooth to a natural tooth or implant.

Pontics - an artificial tooth used in a fixed bridge to replace a missing tooth.
